

Welcome to Jolie Canoli Phonics Sample Coloring Pages!

This series is a labor of love produced by a mama who wanted to fill a missing space on the family bookshelf and an evident gap in early childhood education. While there are oodles of ABC books out there, there are few that introduce the phonetic sounds of the alphabet in an engaging and memorable way. Inspired by the Orton-Gillingham method for instilling literacy skills, I created this book to lead my son on a fun-filled multi-sensory journey to master the phonetic sounds of the alphabet. This book worked for him because it clued in his brain to the mysteries of the English alphabet by triggering not only his visual senses, but also his auditory and kinesthetic ones.

I hope your children enjoy these coloring pages as much fun as my son did (and still does!). May this be a helpful resource on the journey of loving to learn.

Think Bigger, Love Better,
Jolie Canoli

How Jolie Canoli Phonics Works - Learn by Seeing, Hearing, Drawing.

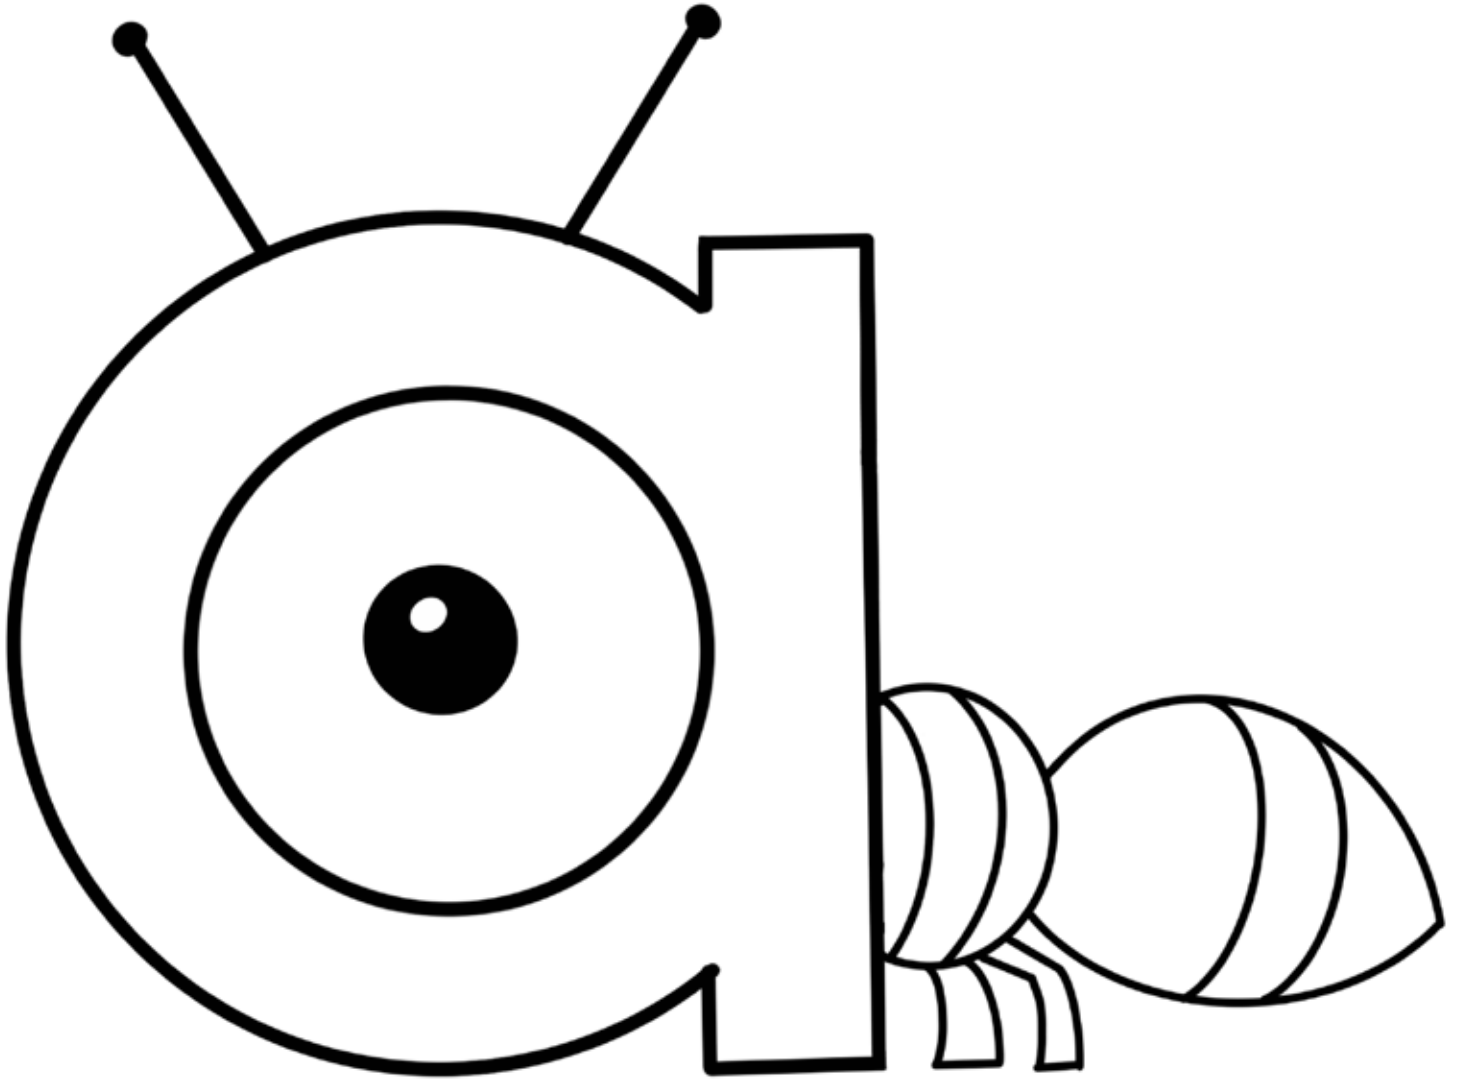

Jolie Canoli Phonics books teach children with reading aloud, kinesthetic activities, fun chants and songs, and game play. The first two books teach all the phonic sounds of the entire alphabet, and the rules for Silent E. The parent, teacher or student reads the book aloud, rehearsing the letter sounds. Letter tracing is included in the book to provide a kinesthetic activity that involves the brain in memorizing the letter shape, as well as teaching proper handwriting skills. Playing cards assist kids in recalling letter sounds through play. Finally the coloring book provides drawing, matching, and reading activities.

The Coloring Book

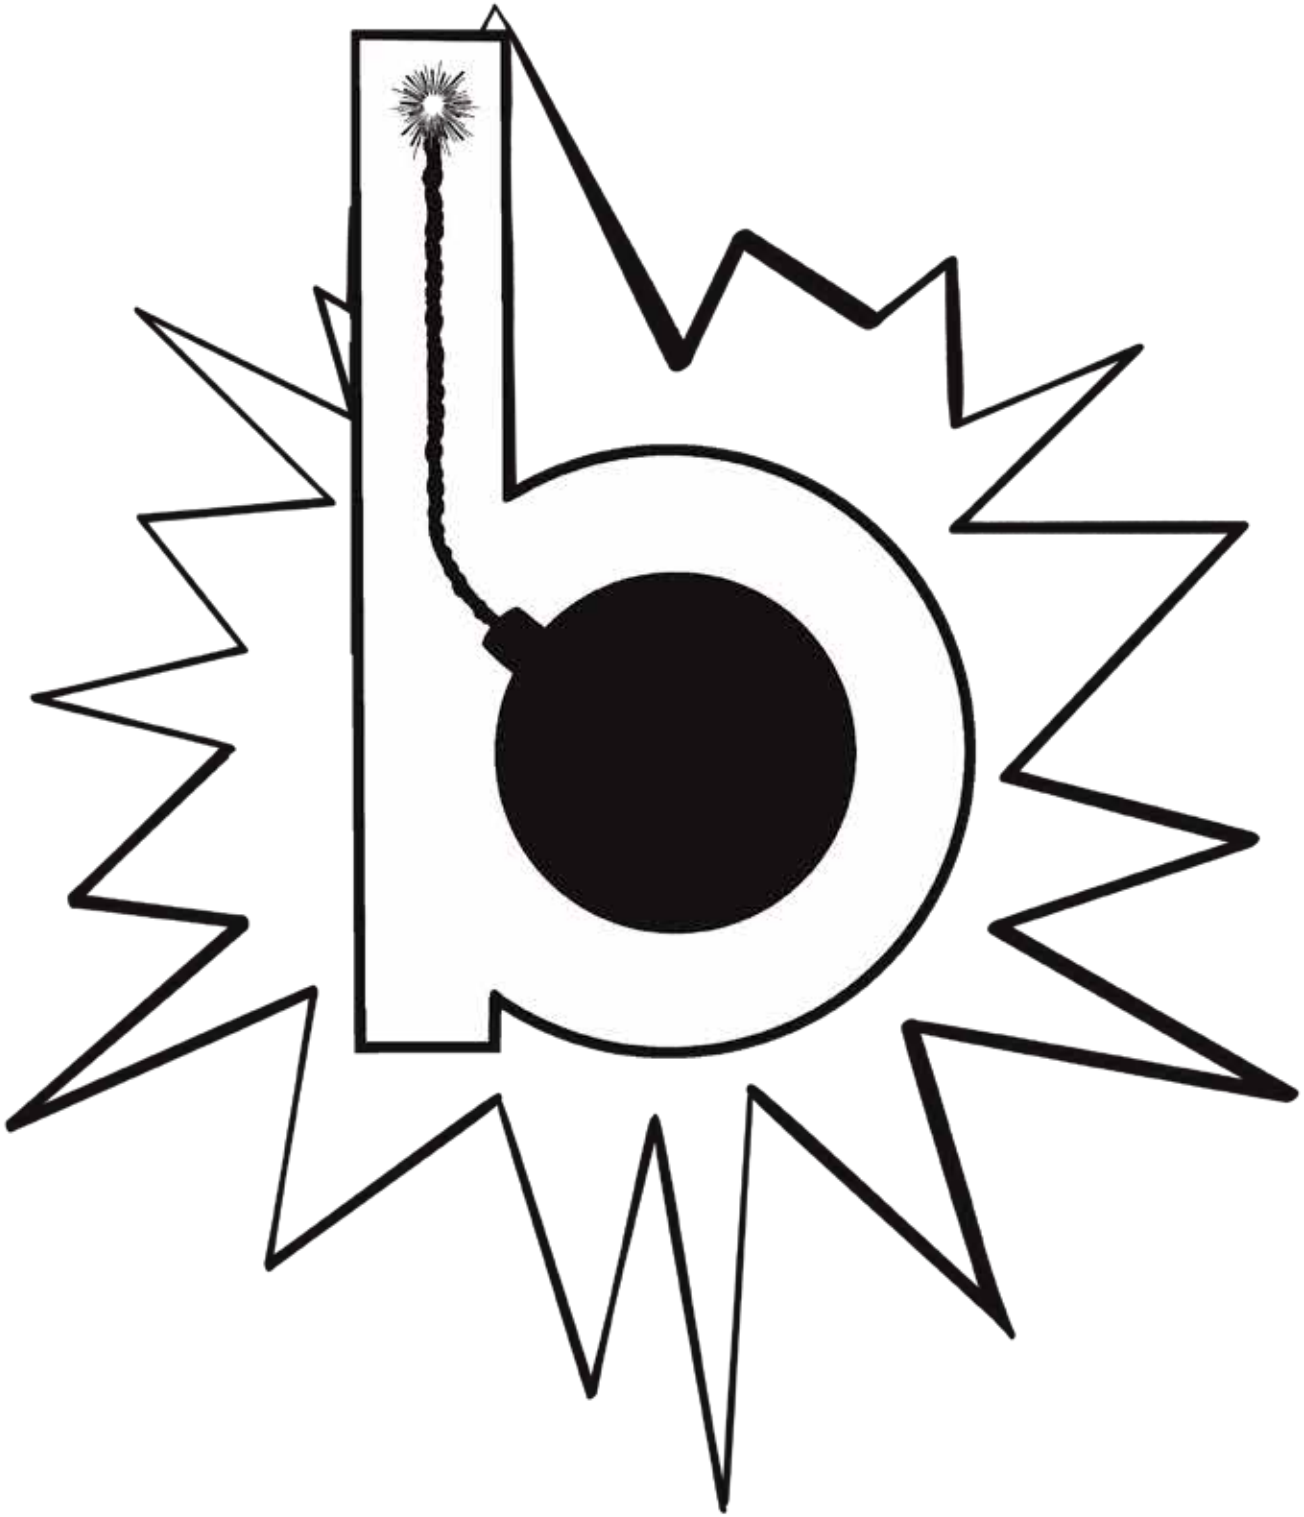

The coloring book includes a coloring page for each letter sound taught in the Jolie Canoli phonics series. There are also fun activity pages that teach word blending with simple 2 or 3-letter words, as well as matching and handwriting activities.

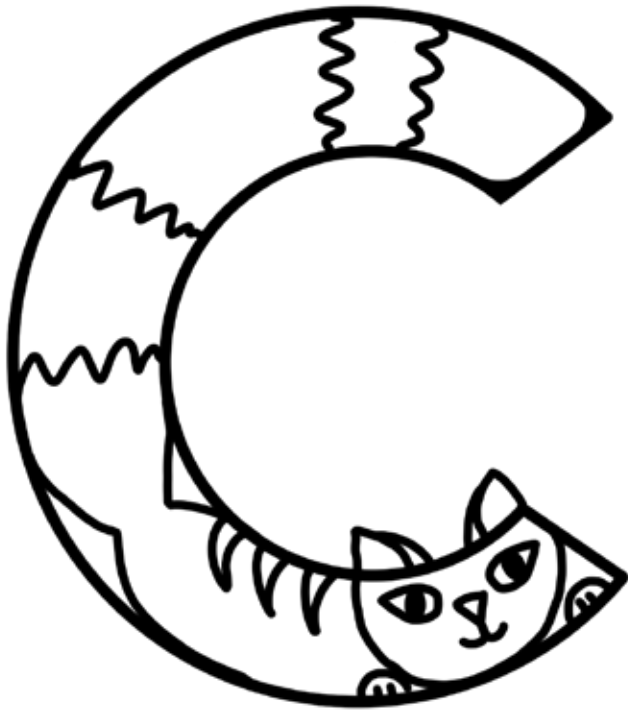

Buddy & Hedgehog pages give your child the chance to rehearse the letter sounds and practice blending those sounds to form words. Blending can be a challenge for children so it is important to model the process. For example, with the word “cab,” point to each letter sound and have the child repeat each sound after you say it, then say the word in full. In other words, you would say, “/k/ ... /a/ ... /b/ ... ka--- /b/. Cab.” Take your time in demonstrating how to blend sounds. Consider saying the sounds slowly at first, then faster with smaller breaks between the sounds, until the child can guess the word themselves. To help your child to recognize the distinct sounds in a word, encourage them to tap their lap, or each letter on the page, as they say each sound.

A is adorably antsy and active,
A will say /ă/ like an ant who's attractive.

First sounds: Say the word. Color the letter that the word starts with.
